In 1953, on orders of the Berlin Technical Office of SAC Transmasch in Berlin-Adlershof, RFT Funkwerk Leipzig was producing on laboratory scale various types of regulators including electronic regulators which, in various reviews published by the Chamber of Engineering, had been described by Engineer Horst Zeibig. The devices were scheduled for large type machines to be exported to the USSR. In late June or early July, these orders were changed to government orders and serial production was planned for 1954.
